

ABSTRACT OF THE DISCLOSURE

A bonus scheme for a gaming device which involves a symbol marker which advances along one or more paths. The paths include a plurality of symbols and one or more path change conditions. If a path change condition
5 occurs, the symbol marker moves from one path to a different path. While advancing along certain paths, the player has the opportunity to gain bonus value depending upon which symbol the symbol marker visits. This type of bonus scheme increases player excitement for gaming devices.
